

## Uniguard Epoxy Thinner

### Product Description

Uniguard Epoxy Thinner is a specially formulated mixture of organic solvents designed to reduce the viscosity of epoxy-based products, enhancing their application properties for smoother and even finishes. It is suitable for a wide range of epoxy paints and coatings, providing excellent thinning properties without compromising the performance of the end product.

### Features and Benefits

- Reduces viscosity, facilitating easier application.
- Improves flow and leveling characteristics of epoxy products.
- Enhances film appearance and adhesion of applied coatings.

### Typical use

- Thinning of epoxy primers, paints, and coatings for spray, brush, or roller application.
- Cleaning tools and equipment used in epoxy applications.

### Product Data

<b>Packaging Size</b>	5 L and 20 L
<b>Form</b>	Liquid
<b>Colors</b>	Clear
<b>Density</b>	0.83 – 0.87 g/cm <sup>3</sup>
<b>Recommended Dosage</b>	5% – 10% by volume.

### Application data

The product can be applied by

<b>Roller</b>	<b>Recommended</b>
<b>Brush</b>	<b>Recommended</b>
<b>Spray</b>	<b>Recommended</b>

### Cleaning of painting tools

Immediate cleaning with xylene is necessary.

### Film Thickness per coat

<b>Dry film thickness</b>	--
<b>Theoretical spreading rate</b>	--

### Thinner (Solvent to mix with)
